

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Archaeologia Cambrensis.

AN

ALPHABETICAL INDEX

TO

THE FIFTH SERIES,

1884-1900,

WITH A LIST OF PAPERS AND ARTICLES.

BY

FRANCIS GREEN.

PUBLISHED FOR

The Cambrian Archaeological Association,

LONDON: CHAS. J. CLARK, 36, ESSEX STREET, STRAND, W.C.

1902.

LIBRARY
UNIVERSITY OF CALIFORNIA
DAVIS

PREFACE.

It is now ⁺seventeen years since the last General Index to the *Archæologia Cambrensis*, by Archdeacon D. R. Thomas, was published, and, as a result, it is a work of time to discover any particular reference after 1883, when the Fourth Series terminated. It was this inconvenience which led me to commence an Index for the Fifth Series, originally for my private use. The work has been brought down to the end of that Series, and it has been suggested that its publication would be appreciated by other members of the Association. I have, with pleasure, acceded to the desire that it should be published.

The Index, it should be mentioned, does not profess to give a reference to every single name. To have carried it out on those lines would have taken far more time than was at my disposal. It is, however, sufficiently full for all general purposes; and I trust that the Volume, the compilation of which has entailed no little work, will prove as useful to my fellow members as it has already proved to myself.

FRANCIS GREEN.
